

CORR  
Serial No. 07/957,080

REMARKS

Claim 1 is being amended to obviate the basis for the Examiner's Section 112 rejection.

Additionally, the claim has been amended in a way which is believed to help stress unobviousness of the applicant's invention. Thus the claim scope has been narrowed somewhat and reference to the at least partial solubility of the lubricant in the heat transfer fluid has been added based on the disclosure at, for example, page 3, first full paragraph.

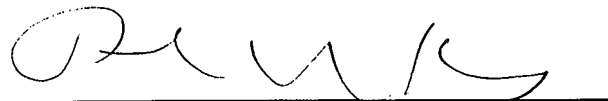

The Examiner's art rejections are dealt with in the accompanying Reply Brief.

Withdrawal of the art rejections by the Examiner or reversal thereof on appeal is requested for the reasons stated.

Respectfully submitted,

CUSHMAN, DARBY & CUSHMAN
